# New Hire MAR Navigation & Medication Documentation

NurseBridge Training Lab – Scenario 1

## Purpose

This guide helps new hires safely and confidently navigate the Medication Administration Record (MAR) and complete medication documentation without errors.

## Core MAR Workflow

1. Open patient chart and navigate to MAR
2. Review Due Now, Scheduled, and All Meds views
3. Select medication and verify patient, dose, and time
4. Click administer and complete documentation
5. Confirm status is updated correctly

## Common Mistakes

1. Staying only in Due Now view
2. Missing scheduled medications
3. Clicking without verification
4. Skipping documentation confirmation

## Quick Tips

1. Always review Scheduled tab at start of shift
2. Check for filters hiding medications
3. Focus on accuracy before speed
4. Follow consistent workflow steps

## Safety Reminder

Medication documentation errors can impact patient safety. Always verify before documenting.
